

Add “host” entry in Windows-7 (client machine)

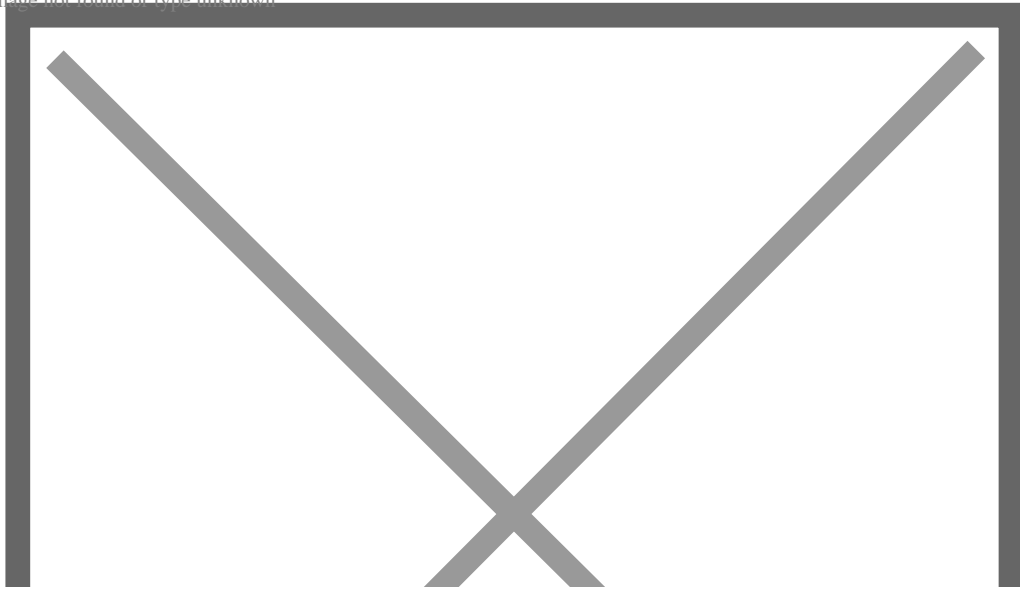

Firstly login with “Administrator” account into the windows client machine and do the following steps:

1. Go to windows the main menu, and click on “? Computer?”

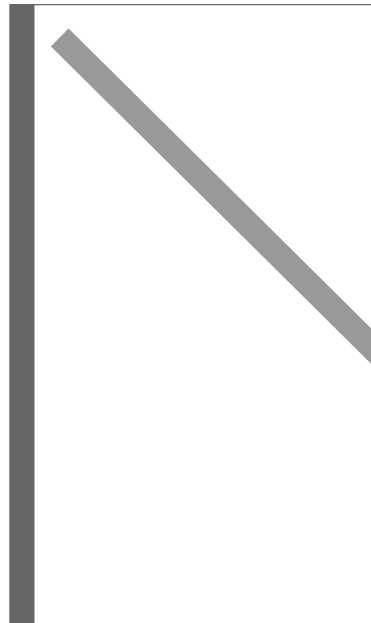

2. Folder explorer will open, click on “Local Disk (C:)” and go to the path “Local Disk (C:) \ Windows \ System32 \ drivers \ etc \ ?”.

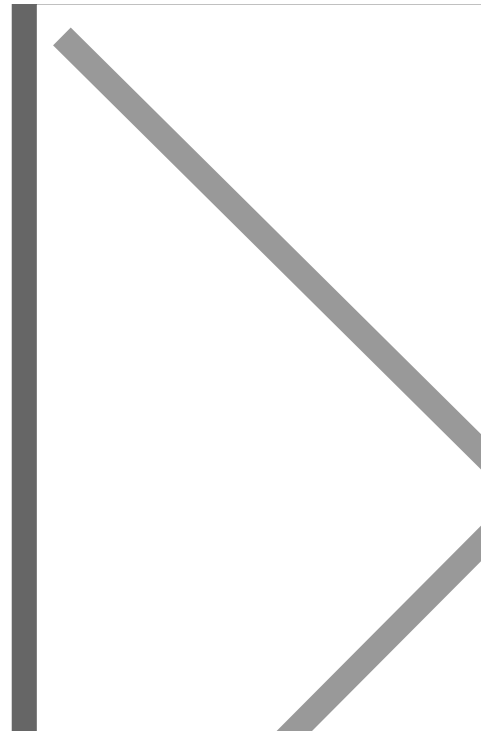

Image not found or type unknown

3. Right-click on “host?” file to edit it and add the host entry

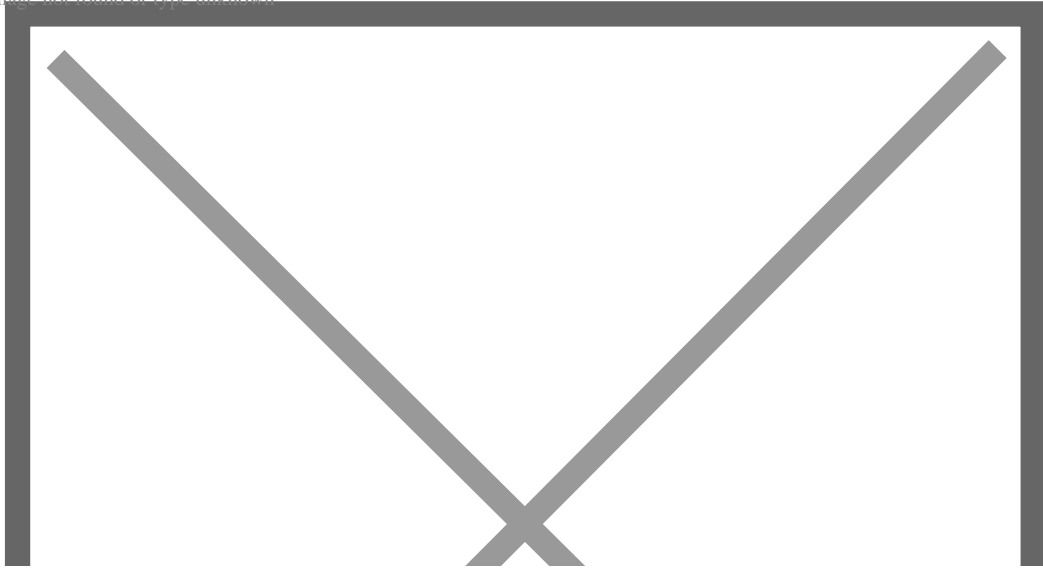

Select ? the notepad program to edit the host file.

5. Add the host entry as “? server_ip clxserver? ” in the host file and ? save it? and then ? close the file.

Image not found or type unknown

After saving and closing the “host” file, you should be able to access the “?https://clixserver?” website from the brow
