

How to use user credentials

Open Google Chrome and enter in the Address bar CLIX offline web address:

<https://clixserver.tiss.edu>

We entered the CLIX page then click on login.

Here we see the CLIX login page

In the CLIX login page, we have to see two boxes, 1 is CLIX Username box & 2nd is password box.

Already the CLIX team has given all schools Usernames and passwords files.

In these file total, 1050 Usernames & passwords are present with 1-50 Usernames & Passwords for teachers, 51 -1050 Usernames & passwords for students

Example for Student Usernames:

color-animal/fruit/flower/birds/insects-school server-id

black-ant-tg1, green-strawberry-tg150

Similar to the examples, students will have a unique combination of student Ids and passwords. Every school has a server machine, which does not have a monitor and the “clix server” is written on the CPU. Every server has a unique number as mentioned in the example

Example of Teacher Username & password:

color-element-school server-id

blue-iron-tg3, red-copper-tg130, green-silver-tg260

School staff allocates 8th & 9th students these Usernames & Passwords

Every student has a separate Username & password in 8th & 9th class

Teachers also have subject-wise usernames & passwords English-iron, Maths-copper, science-silver

Teacher ID is a combination of color-element and school server ID. Element iron is assigned for English teachers, copper for math and silver for science teachers. 5 teacher ids for each subject will be provided for each school, which means a school

will have a total of 15 teacher IDs. 5 for English(iron), 5 for math(copper) and 5 for science(silver). Teachers can use teacher IDs to see student's work, which is group analytics.

Teachers can see all i2c modules and their respective subject course analytics but not the other subject. For group analytics, you can also show the teacher help document. Every school will

have 15 ids for teachers, 5 for each subject. Please note the following combinations will be the same for all schools (*blue-iron, green-iron, orange-iron, red-iron,*

yellow-iron: English teachers, similarly blue-copper,

orange-copper, red-copper, yellow-copper: Math), however, the only difference would be it will have a unique school server-id.

There are just five colors and 3 elements. After the Student login in case 1 system for 2 or 3 students sitting 2nd, 3rd student need to login via buddy login.

On the CLIX page after login with ID & password we have to login buddy so go to top left here show + button, click that button then display colors & 2nd word of Username(animals, fruit, flower, etc.,). Students add their ID.

Then go to explore here all subject modules are then Goto any subject module then display units, goto unit then display lessons, In every unit, we have pre-test & post-test are their.

Every lesson sub lessons are present. In every lesson, there are subject contents displayed as a text, audio, video, exam test wise.

Revision #3
